## Arigo Enhances Enterprise Collaboration Capabilities with Latest Software Release

**N. Billerica, MA – July 28, 2011** – Arigo, the leading provider of Visibility, Intelligence, and Collaboration tools for retailers and brand owners supporting Sourcing and Global Trade Management, has released v10.1 of its time-tested, best practice software solutions, providing significant improvements in usability, navigation, integrated reporting, process optimization, and overall, enhanced enterprise collaboration.

“Arigo continues to innovate with its flagship STM software helping companies to better manage their sourcing and global trade management needs. The latest release further enhances Arigo STM’s aptitude in reporting, collaboration, and process optimization. We are excited that this release will further differentiate us from our competitors and help our customers grow their businesses,” says Bill Ren, CEO of Arigo.

### **New Features**

#### **Web-based Workflow and Exception Management Query Configuration Tool**

Arigo’s web-based workflow and exception management query configuration tool enables users to view data and manage information by creating user-defined drills and queries. Users can select, group, and sort information to address business-specific requirements, as well as view data from multiple joined tables, including transactional screens and boosters, and drill down to view/change actual records in transaction screens.

#### **Integrated Reporting Capability**

Arigo’s integrated reporting capabilities enable users to utilize simple and highly-formatted reports for applications such as customized scorecards. Arigo reporting capabilities facilitate on-demand reports through the use of templates, accelerating report generation and providing a consistent look-and-feel. Pixel-perfect reports are made easy with the drag-and-drop graphical designer, which can be utilized for comprehensive control of data access, layout, grouping, calculations, charting, and formatting. Reports can also be localized easily to support multi-lingual deployment with a single report file.

#### **Asynchronous Communication for Global Collaboration**

Arigo’s asynchronous communication capabilities provide a one-to-many communication channel, increasing interaction between customers and their suppliers and enabling collaboration in the global marketplace regardless of time zone. Communication is auditable and archived to transaction level data, providing an increased level of accountability. It also enables customers and trading partners to communicate at the SKU level throughout the product lifecycle.

Arigo is proud to serve its distinguished customers and is committed to ensuring that every Arigo client receives the maximum benefit from our sourcing and trade management solutions. Our success is defined by your success.

### **About Arigo**

Arigo is the industry leading provider of Visibility, Intelligence, and Collaboration for retailers and brand owners supporting sourcing and global trade management, from pre-production through delivery. Arigo solutions provide robust functionality supporting milestone tracking, sourcing, costing, trading partner collaboration, and logistics, as well as full supplier and product quality assurance and compliance. Arigo solutions help businesses manage critical information across their organizations through an intuitive, one-stop Arigo Desktop, which provides access to all of the data, tools, and trade content needed to support global operations. For over a decade, Arigo has helped customers such as JCPenney, The Home Depot, Staples, RadioShack, Timberland, and many others build and scale world-class, private label organizations.
