

# Arigo Advanced Collective

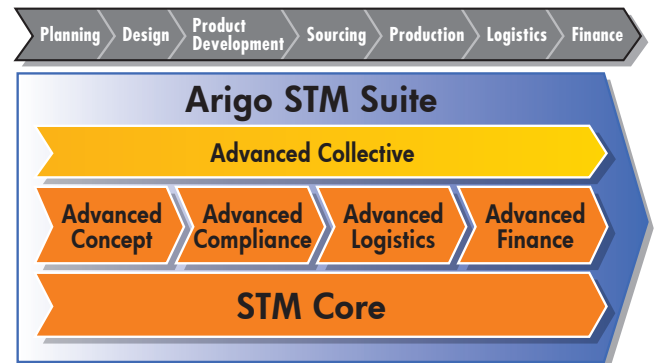

## Manage, Control, and Organize Product Information and Concepts.

- Manage product information, content, visual assets, and concepts in one system, integrated with sourcing and logistics – to deliver better products with higher margins.
- Control product information to get everyone working off the right version of information. Easily see the history of changes and previous versions.
- Organize and annotate product information to create collections and storyboards.

**Advanced Collective extends product information across organizational boundaries.** Share product information between internal teams and external partners to deliver the best product at the best price. Avoid costly errors and delays with multiple versions of data in email, spreadsheets, and shared drives scattered across the network. Advanced Collective makes it easy to find the right version of product information in one system integrated with sourcing and logistics.

Organize and annotate digital assets in Advanced Collective to create collections and storyboards. Associate content to multiple projects to explore concepts and promote design reuse.

Advanced Collective unites information across concept development, sourcing, logistics, and suppliers to deliver better products with higher margins.

Advanced Collective manages product information and visual assets in one system integrated with sourcing.

## Key Features:

- Store, tag, and comment on digital assets.
- Manage a wide range of digital assets, including images, video, and documents.
- Graphical user interface makes it easy to find and manage product information.
