

# Arigo Advanced Compliance

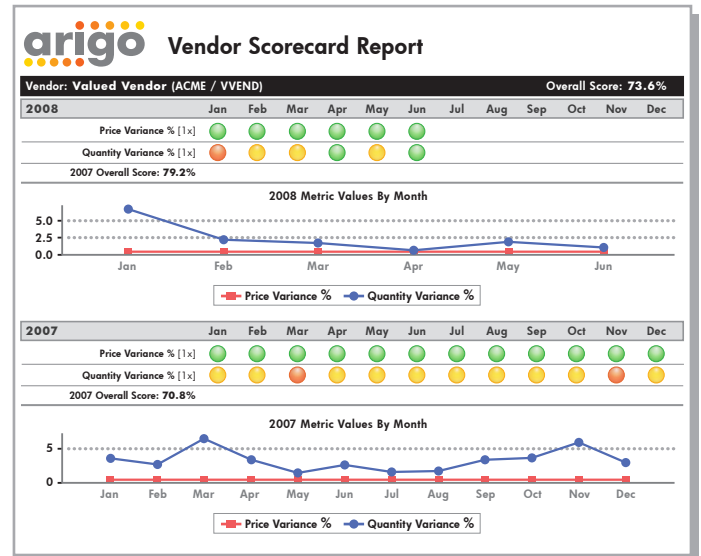

## Make Vendor Decisions Faster

- Tie vendor and product compliance to sourcing decisions.
- Quickly know if vendors are filling orders on time and at the right price.
- Choose the right vendors from thousands of suppliers with pre-configured scorecards.

Arigo Advanced Compliance helps retailers ensure that they're doing business with the right vendors. Protect the value of your brand by tying sourcing decisions to vendor compliance, product compliance, and delivery performance.

Advanced Compliance manages compliance, capacity and delivery performance data in one system integrated with sourcing. Track vendor compliance, including regulatory certifications and social compliance. Track product compliance, including quality control testing and inspection results. Track specialized capacity and delivery performance – know whether vendors are delivering the right amounts, on time and at the right price. Workflow ties all this data into business processes so buyers can have visibility to vendor performance before they place an order.

Vendor scorecards make it easy to compare and track vendor performance across a global supply chain. Track price and quantity and variances against key performance indicators (KPIs) over time. Configure KPIs to meet seasonal needs. Advanced Compliance makes it easy to track vendor compliance and performance – to ensure that your business is working with the right suppliers.

Pre-configured scorecards make it easy to track vendor performance against price and quantity goals.

## Key Features: Advanced Compliance

- Track vendor performance with pre-configured scorecards.
- Manage vendor compliance data, including templates for certifications, social compliance, factory compliance, and key performance indicators.
- Manage product compliance data, including templates for consumer safety, inspection, and testing data.
- Develop vendor capacity plans by product requirements, specialized equipment, and time period.
- Tie compliance data into business process with automated alerts and pre-configured workflows.
