

# Arigo Advanced Finance

**Make sourcing decisions with fully-landed costs instead of incomplete product costs.**

- Explore landed cost scenarios to maximize margin.
- Reconcile costs to know what goods really cost.
- Eliminate the complexity of comparing sourcing alternatives across multiple countries.

**Advanced Finance makes it easy to estimate landed cost before you place an order and reconcile actual landed cost after delivery.** The powerful costing engine is integrated with sourcing and logistics – making it easy to develop estimated and actual landed costs. Detailed cost elements for tariffs, logistics, and service fees are integrated throughout the system. Advanced Finance automatically normalizes different currencies making it easy to compare sourcing scenarios by estimated landed cost. Cost scenarios can be developed forward from cost elements or backwards from target margins. When a sourcing decision is made, Advanced Finance makes it easy to generate letters of credit from purchase orders in the system.

After goods are delivered, Advanced Finance reconciles actual landed costs to audit vendor performance and improve planning. The costing engine performs detailed analysis that ties cost variances to business processes. Get insight to see if the planned customs classification matched the actual classification used when the goods cleared customs, and how that impacted cost. Arigo Advanced Finance builds powerful costing analysis into sourcing and logistics processes before the order is placed, and after the goods are delivered.

Advanced Finance adds powerful costing and analysis to drive sourcing decisions based on total landed costs.

## Key Features:

- Reconcile estimated and actual landed costs and explore variances.
- Detailed forward and backward landed cost development
- Simulate multiple estimated landed cost scenarios.
- Compare the full range of cost alternatives including materials, labor, duties, service fees, and logistics.
- Manage variances, charge-backs, promotional discounts, and pricing adjustments.
- Calculate duties for multi-product, multi-country goods based on packaging and assembly.
- Generate and amend letters of credit.
- Manage commercial and service invoices.
- SOX-compliant record keeping

## For More Information

Arigo STM Suite is used by the world's leading retailers to optimize global sourcing and product development including Staples®, The Home Depot®, JCPenney®, Argos®, RadioShack®, and Timberland®. Annually, Arigo helps customers source over \$100 billion in goods from over 50 countries; manage over 40 million SKUs; track over 2 million containers; and provide production visibility into over 75,000 suppliers.
